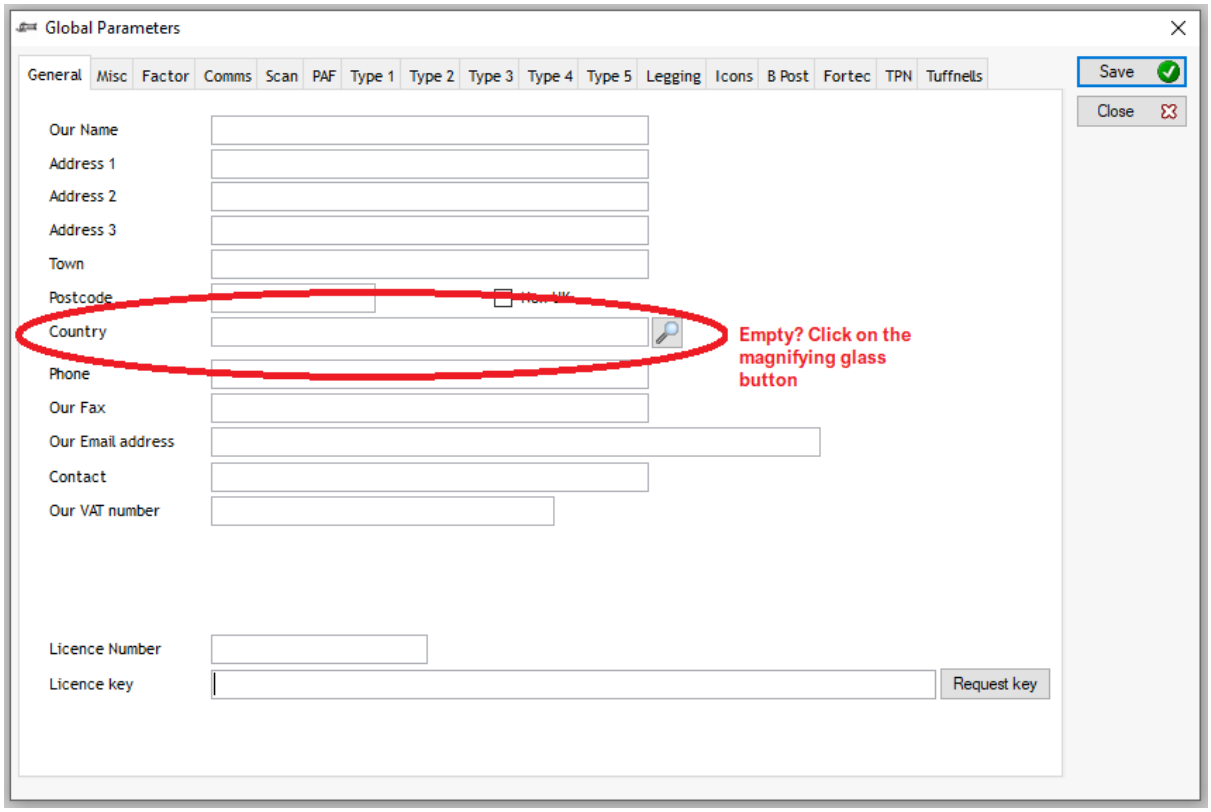
Loadmaster – Country and Hazchem files

We have noticed that some users are working without these, but they are a good addition to the system.

To find out if you have the Country file loaded simply go into Global Parameters.



Clicking on the magnifying glass button will display the Country file.

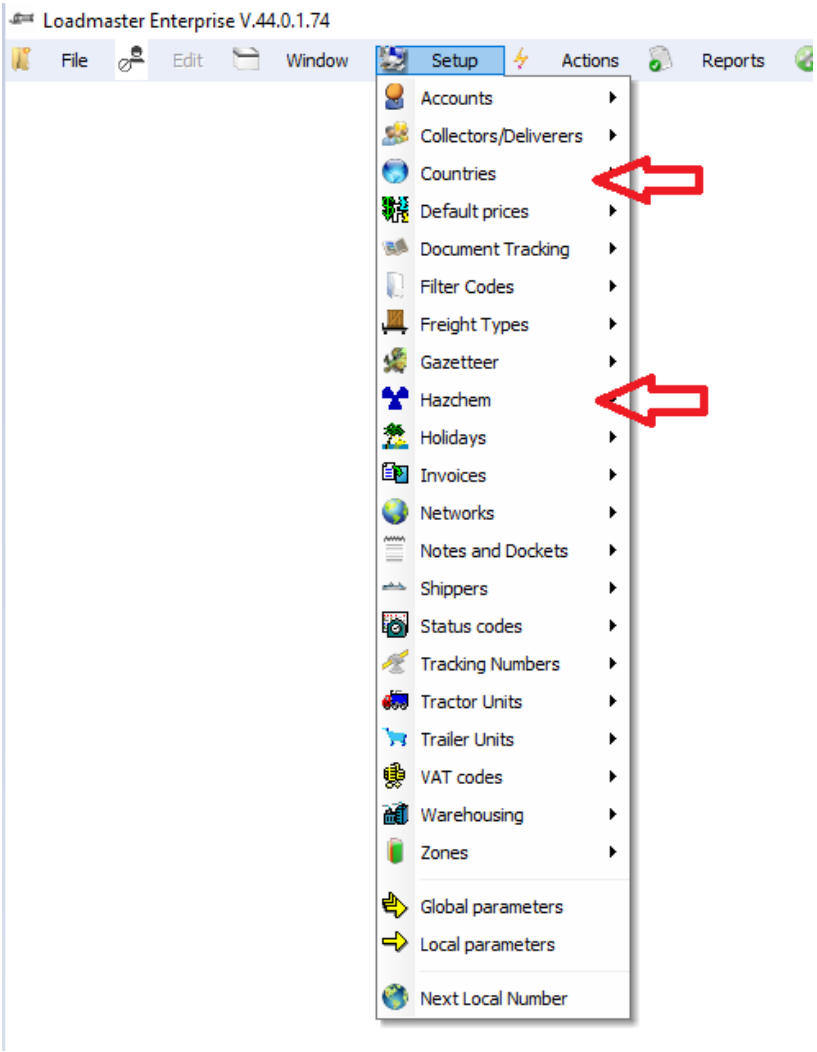
ZiPZAP Computers Limited - Available downloads

Files in https://www.zipzap.co.uk/downloads/Shop/LoadmasterEnterprise/Data:

- Aclfinal.txt 154KB — Hazchem data
- Gazetteer.FIC 6MB
- countries.csv 4KB — Country data
- Gazetteer.ndx 10MB

Note there is another file here called Aclfinal.txt – this is a list of Hazchem codes if you are missing that as well. You can check Hazchem on the Actions menu.

These are both loaded from the Setup menu.



To load the countries file, go into Setup then Countries. There is an import button in the bottom left. Remember to go back into Global Parameters and select YOUR country.

To load the Hazchem file, go into Setup then Hazchem and 'Import ACL file.'
